

Gulf Union joins ERA users

London, UK. 27 January 2012

Bahrain-based Gulf Union Insurance and Project Management Holding Company has become the latest organisation to take up ERA. The company has chosen Methodware's fully integrated GRC platform to automate its risk and compliance framework.

Gulf Union says it plans to use ERA primarily across its motor and medical insurance businesses to perform periodic risk assessments, action tracking, loss event capture and reporting.

Methodware is delighted to be working with Gulf Union to support this cohesive risk management strategy and to welcome Gulf Union to our international client base.
